

PROTOCOL K-651

Technical Data Sheet

Application: Calcium, Rust and Lime Remover

Description

SANITIZER. K-651 is a tub, tile, and grout cleaner made from an organic salt/surfactant blend that is designed to quickly penetrate dirt oil, grease, calcium carbonate, lime, rust, and other everyday soils. K-651 is safe to use on any surface (must be thoroughly rinsed from all surfaces after use). The blend of surfactants and organic salts enables K-651 to outperform traditional acid based cleaners. For specific use in food plants, see directions.

Directions

Apply solution using a foamer, sponge, soft brush, or cloth. Let stand for 10 - 30 seconds. Some agitation may be required. Wipe with a damp cloth or rinse with water. Dilution rates (K-651:Water): Light soils: 1:5, Medium soils and soft metals: 1:3, Heavy soils, lime, rust and calcium build-up: use undiluted. RINSE THOROUGHLY FROM ALL SURFACES. Food contact surfaces must be rinsed with potable water before reuse. Please refer to our dilution chart for more detailed information.

Personal Protective Equipment Required

- Rubber gloves to prevent drying of hands
- Chemical goggles or safety glasses

General First Aid Information

• Inhalation

Remove victim to fresh air. Allow rest in a well ventilated area.

• Ingestion

Induce vomiting. Give victim large amounts of water. Seek medical attention.

• Skin Contact

In case of contact with skin, rinse thoroughly with water.

• Eye Contact

In case of contact with eyes, flush eyes with plenty of water.

**For further safety information
please consult the MSDS**

Packaging Options

- 12 x 1L
- 20L
- 4 x 4L
- 60L
- 205L

Physical Properties

State.....Liquid
Colour.....Colourless
Odour.....Mild
pH0.5-1.5

CFIA Approved

Active Ingredients: Organic Surfactant,
Organic Salts
